Re: 98N-1230, 96P-0418, and 97P-0197

On behalf of the student body at Columbia University in New York City, I am reaching out to express a serious concern:

The most effective and direct way to reduce salmonella in eggs would be to eliminate the practice of forced molting. You must do more than put warning labels on egg cartons and regulate egg refrigeration temperatures.

Sincerely,

William John Divney
